linkedin.com/in/anoorishad/ | github.com/anoorishad | anoorishad.com

Full-stack web developer leveraging a background in IT, looking to balance functionality and design while optimizing the end-user experience. Recently earned a certificate in full-stack development from the University of Washington, with skills in JavaScript, CSS, React.js, and responsive web design. Approaches every project analytically and determined to produce exemplary results. Excited to utilize these skills in a fast-paced and adaptable team, driven to create unique web experiences.

Technical Skills

HTML5, CSS, JQuery, JavaScript, Bootstrap, AJAX, MySQL, MongoDB, Express, ReactJS, Node, Handlebars

Projects

IYKYK | github.com/Jeff-T-Schmidt/IYKYK | iykyk-frontend.herokuapp.com/

- An event-focused social media app, where users can plan and engage in an event or activity they are going to. This application allows the user to send and receive email invitations to events, which they can then access and chat with other users invited to the same event.
- Full-stack developer and project manager
- Tools/Languages: HTML, CSS, JavaScript, Node, React, Heroku

DreamTheme | github.com/SFelbeck/DreamTheme | dreamtheme.herokuapp.com/login

- Generates themes dynamically using DreamTheme templates as the source of themes to provide mechanisms to manage those themes and their updates programmatically.
- Full-stack web developer and project manager
- Tools/Languages: JavaScript, Handlebars, CSS, Masonry

Socializer | github.com/anoorishad/Socializer | anoorishad.github.io/Socializer/

- Use socializer to help you choose recipes and beverages to host a party.
- GIT administrator and full-stack developer
- Tools/Languages: 3rd party API's, HTML, CSS, JavaScript, JQuery, Materialize
